

K-Love, a current FM translator service, has been a huge blessing to me for the last 10+ years. It not only provides positive music, but provides an avenue to listen to around young, influential children. I do not need to worry about a certain song or DJ saying something that would offend me or my family. It also provides free PSAs for events taking place around my community. Many radio stations only air PSAs that benefit the station one way or another.

Thousands of local residents would be devastated if KLOVE were to be replaced by a LPFM broadcaster. It would strip away positive broadcasting. I am unaware of any other current station that does not allow some type of vulgar language or topics in some manner. Listening to KLOVE provides a peaceful spirit within me.

I hope you reconsider the proposed expansion of LPFM stations that would result in a huge devastation to the public at large!
